CONTENTS OF VOLUME 43

NUMBER 1, SEPTEMBER, 1959

SASAKI, SUSUMU, and NOGUCHI, HAJIME. Interaction of fibrinogen with dextran sulfate 1

COUTINHO, ELSIMAR M., and CSAPO, ARPAD. The effect of oxytocics on the "Ca-deficient" uterus. A measure of oxytocic potency 13

EPPLEY, RICHARD W. Potassium accumulation and sodium efflux by *Porphyra perforata* tissues in lithium and magnesium sea water 29

TASKER, PATRICIA, SIMON, SHIRLEY E., JOHNSTONE, B. M., SHANKLY, K. H., and SHAW, F. H. The dimensions of the extracellular space in sartorius muscle 39

SIMON, SHIRLEY E., JOHNSTONE, B. M., SHANKLY, K. H., and SHAW, F. H. Muscle: A three phase system. The partition of monovalent ions across the cell membrane. 55

FRATER, R., SIMON, SHIRLEY E., and SHAW, F. H. Muscle: A three phase system. The partition of divalent ions across the membrane 81

PASSOW, HERMANN, ROTHSTEIN, ASER, and LOEWENSTEIN, BARBARA. An all-or-none response in the release of potassium by yeast cells treated with methylene blue and other basic redox dyes 97

ALPERN, MATHEW, and DAVID, HERBERT. The additivity of contrast in the human eye 109

CASTAÑEDA-AGULLÓ, M., and DEL CASTILLO, LUZ M. Effect of the medium dielectric strength on the activity of alpha chymotrypsin 127

MAÉNO, TAKASHI. Electrical characteristics and activation potential of *Bufo* eggs 139

BENNETT, M. V. L., CRAIN, S. M., and GRUNDFEST, H. Electrophysiology of supramedullary neurons in *Spheroides maculatus*. I. Orthodromic and antidromic responses 159

BENNETT, M. V. L., CRAIN, S. M., and GRUNDFEST, H. Electrophysiology of supramedullary neurons in *Spheroides maculatus*. II. Properties of the electrically excitable membrane 189

BENNETT, M. V. L., CRAIN, S. M., and GRUNDFEST, H. Electrophysiology of supramedullary neurons in *Spheroides maculatus*. III. Organization of the supramedullary neurons 221

NUMBER 2, NOVEMBER, 1959

ROBERT EMERSON • 1903–1959

BRODY, MARCIA, and EMERSON, ROBERT. The quantum yield of photosynthesis in *Porphyridium cruentum*, and the role of chlorophyll *a* in the photosynthesis of red algae 251

RIGBY, BERNARD J., HIRAI, NISHIO, SPIKES, JOHN D., and EYRING, HENRY. The mechanical properties of rat tail tendon 265

Alma College Library
Alma, Michigan

SWEENEY, B. M., HAXO, F. T., and HASTINGS, J. W. Action spectra for two effects of light on luminescence in *Gonyaulax polyedra* 285

CARLSON, FRANCIS D., and SIGER, ALVIN. The creatine phosphoryltransfer reaction in iodoacetate-poisoned muscle 301

EDWARDS, C., and HAGIWARA, S. Potassium ions and the inhibitory process in the crayfish stretch receptor 315

JACOBSON, K. BRUCE. Studies on the role of *N*-acetylaspartic acid in mammalian brain 323

LOEWENSTEIN, WERNER R., and COHEN, STANLEY. I. After-effects of repetitive activity in a nerve ending 335

LOEWENSTEIN, WERNER R., and COHEN, STANLEY. II. Post-tetanic potentiation and depression of generator potential in a single non-myelinated nerve ending 347

CERF, J. A., GRUNDFEST, H., HOYLE, G., and MCCANN, FRANCES V. The mechanism of dual responsiveness in muscle fibers of the grasshopper *Romalea microptera* 377

ZIZZA, F., CAMPBELL, T. J., and REEVE, E. B. The nature and rates of excretion of radioactive breakdown products of I^{131}-albumin in the rabbit 397

REEVE, E. B., and ROBERTS, J. E. The kinetics of the distribution and breakdown of I^{131}-albumin in the rabbit. Observations on several mathematical descriptions 415

REEVE, E. B., and ROBERTS, J. E. The catabolism of plasma albumin in the rabbit. Its rate and regulation 445

GOTO, M., and CSAPO, ARPAD. The effect of the ovarian steroids on the membrane potential of uterine muscle 455

APPLEBOOM, JOHANNES W. TH., BRODSKY, WILLIAM A., and REHM, WARREN S. The concentration of glucose in mammalian liver 467

NUMBER 3, JANUARY, 1960

SHANES, A. M., and BIANCHI, C. P. Radiocalcium release by stimulated and potassium-treated sartorius muscles of the frog 481

WILSON, VICTOR J., and TALBOT, WILLIAM H. Recurrent conditioning in the cat spinal cord. Differential effect of meprobamate on recurrent facilitation and inhibition 495

PONDER, ERIC, and PONDER, RUTH V. The electrophoretic velocity of human red cells, of their ghosts and mechanically produced fragments, and of certain lipid complexes 503

FLOREY, ERNST, and BIEDERMAN, M. A. Studies on the distribution of factor I and acetylcholine in crustacean peripheral nerve 509

ROBBINS, ELLIOTT, and MAURO, ALEXANDER. Experimental study of the independence of diffusion and hydrodynamic permeability coefficients in collodion membranes 523

KRUEGER, ALBERT P., and SMITH, RICHARD F. The biological mechanisms of air ion action. I. 5-hydroxytryptamine as the endogenous mediator of positive air ion effects on the mammalian trachea 533

NORTHROP, JOHN H. Studies of the origin of bacterial viruses. VI. Effect of man-

ganese on the proportion of phage-producing, terramycin-resistant, streptomycin-resistant, and phage-resistant cells in lysogenic *megaterium* cultures 541

NORTHROP, JOHN H. Apparatus for the maintenance of bacterial cultures in the steady state. II. Improved turbidity control and culture cell 551

CURRAN, PETER F., and SCHWARTZ, GORDON F. Na, Cl, and water transport by rat colon 555

RUPERT, CLAUD S. Photoreactivation of transforming DNA by an enzyme from bakers' yeast 573

DALTON, J. C., and ADELMAN, W. J., JR. Some relations between action potential and resting potential of the lobster giant axon 597

ADELMAN, W. J., JR., and DALTON, J. C. Interactions of calcium with sodium and potassium in membrane potentials of the lobster giant axon 609

PASSOW, HERMANN, and ROTHSTEIN, ASER. The binding of mercury by the yeast cell in relation to changes in permeability 621

HEARD, D. H., and SEAMAN, G. V. F. The influence of pH and ionic strength on the electrokinetic stability of the human erythrocyte membrane 635

KENNEDY, DONALD, and PRESTON, JAMES B. Activity patterns of interneurons in the caudal ganglion of the crayfish 655

PRESTON, JAMES B., and KENNEDY, DONALD. Integrative synaptic mechanisms in the caudal ganglion of the crayfish 671

NUMBER 4, MARCH, 1960

PAIK, WOON KI, and COHEN, PHILIP P. Biochemical studies on amphibian metamorphosis. I. The effect of thyroxine on protein synthesis in the tadpole 683

HASTINGS, J. WOODLAND, and SWEENEY, BEATRICE M. The action spectrum for shifting the phase of the rhythm of luminescence in *Gonyaulax polyedra* 697

OLMSTEAD, EDWIN G. Efflux of red cell water into buffered hypertonic solutions 707

LLOYD, DAVID P. C. Electrical impedance changes of the cat's foot-pad in relation to sweat secretion and reabsorption 713

MYERS, JACK, and FRENCH, C. S. Evidences from action spectra for a specific participation of chlorophyll *b* in photosynthesis 723

RIGGS, AUSTEN. The nature and significance of the Bohr effect in mammalian hemoglobins 737

PONDER, ERIC, and PONDER, RUTH V. The interaction of dextran with serum albumin, gamma globulin, and fibrinogen 753

MULLINS, L. J., and MOORE, R. D. The movement of thallium ions in muscle 759

GOLDSMITH, TIMOTHY H. The nature of the retinal action potential, and the spectral sensitivities of ultraviolet and green receptor systems of the compound eye of the worker honeybee 775

DAVISON, PETER F., and TAYLOR, EDWIN W. Physical-chemical studies of proteins of squid nerve axoplasm, with special reference to the axon fibrous protein 801

EADIE, G. S., SMITH, WIRT W., and BROWN, IVAN W., JR. The use of DFP^{32} as a red cell tag with and without simultaneous tagging with $chromium^{51}$ in certain animals in the presence or absence of random destruction 825

BERGMANN, LUDWIG. Growth and division of single cells of higher plants *in vitro* 841

ROBBINS, ELLIOTT. The rate of proflavin passage into single living cells with application to permeability studies 853

NUMBER 5, PART 1, MAY, 1960

FITZHUGH, RICHARD. Thresholds and plateaus in the Hodgkin-Huxley nerve equations 867

JAFFE, L. F. The effect of polarized light on the growth of a transparent cell. A theoretical analysis 897

BOREK, BLANCHE ANN, ZAFFUTO, STEPHEN F., and BOVARNICK, MAX. An adenosinetriphosphate-activated hemolytic system. III. Effect of rabbit hemolytic factor on the membrane permeability of human red cells 913

GASSER, HERBERT S. Effect of the method of leading on the recording of the nerve fiber spectrum 927

JOHNSON, WILLIAM H., and TWAROG, BETTY M. The basis for prolonged contractions in molluscan muscles 941

MOORE, JOHN W., and COLE, KENNETH S. Resting and action potentials of the squid giant axon *in vivo* 961

COLE, KENNETH S., and MOORE, JOHN W. Liquid junction and membrane potentials of the squid giant axon 971

LOEWENSTEIN, W. R., and ISHIKO, N. Effects of polarization of the receptor membrane and of the first Ranvier node in a sense organ 981

SIAKOTOS, A. N. The conjugated plasma proteins of the American cockroach. I. The normal state 999

SIAKOTOS, A. N. The conjugated plasma proteins of the American cockroach. II. Changes during the molting and clotting processes 1015

NUMBER 5, PART 2, MAY, 1960

SOLOMON, A. K. Red cell membrane structure and ion transport 1

CONWAY, E. J. Principles underlying the exchanges of K and Na ions across cell membranes 17

WHITTEMBURY, GUILLERMO. Ion and water transport in the proximal tubules of the kidney of *Necturus maculosus* 43

TOBIAS, JULIAN M. Further studies on the nature of the excitable system in nerve. I. Voltage-induced axoplasm movement in squid axons. II. Penetration of surviving, excitable axons by proteases. III. Effects of proteases and of phospholipases on lobster giant axon resistance and capacity 57

VILLEGAS, RAIMUNDO, and VILLEGAS, GLORIA M. Characterization of the membranes in the giant nerve fiber of the squid 73

MULLINS, L. J. An analysis of pore size in excitable membranes 105

ABBOTT, B. C. Heat production in nerve and electric organ 119

SACKS, JACOB. Insulin and the transport of sugars across cell membranes 129

USSING, HANS H. The frog skin potential 135

LING, GILBERT NING. The interpretation of selective ionic permeability and cellular potentials in terms of the fixed charge-induction hypothesis 149

LEAF, ALEXANDER. Some actions of neurohypophyseal hormones on a living membrane 175

NUMBER 6, PART 1, JULY, 1960

WATANABE, AKIRA, and BULLOCK, THEODORE H. Modulation of activity of one neuron by subthreshold slow potentials in another in lobster cardiac ganglion 1031

DEICHMILLER, MARIA P., and DIXON, FRANK J. The metabolism of serum proteins in neonatal rabbits 1047

FLOREY, ERNST. Studies on the nervous regulation of the heart beat in decapod crustacea 1061

NAORA, HIROTO, NAORA, HATSUKO, and BRACHET, JEAN. Studies on independent synthesis of cytoplasmic ribonucleic acids in *Acetabularia mediterranea* 1083

GILBERT, DANIEL L. Magnesium equilibrium in muscle 1103

DUMONT, P. A., CURRAN, PETER F., and SOLOMON, A. K. Calcium and strontium in rat small intestine. Their fluxes and their effect on Na flux 1119

CURRAN, PETER F. Na, Cl, and water transport by rat ileum *in vitro* 1137

KUNITZ, M. Chicken intestinal alkaline phosphatase. I. The kinetics and thermodynamics of reversible inactivation. II. Reactivation by zinc ions 1149

WHITTAM, R., and GUINNEBAULT, M. The efflux of potassium from electroplaques of electric eels 1171

THOMAS, LYELL J., JR. Increase of labeled calcium uptake in heart muscle during potassium lack contracture 1193

INDEX TO VOLUME 43 1207

NUMBER 6, PART 2, JULY, 1960

DE ROBERTIS, E. Some observations on the ultrastructure and morphogenesis of photoreceptors 1

VILLEGAS, GLORIA M. Electron microscopic study of the vertebrate retina 15

WAGNER, H. G., MACNICHOL, E. F., JR., and WOLBARSHT, M. L. The response properties of single ganglion cells in the goldfish retina 45

HURVICH, LEO M., and JAMESON, DOROTHEA. Perceived color, induction effects, and opponent-response mechanisms 63

TOMITA, TSUNEO, MURAKAMI, MOTOHIKO, and HASHIMOTO, YOKO. On the R membrane in the frog's eye: Its localization, and relation to the retinal action potential 81

MITARAI, GENYO. Determination of ultramicroelectrode tip position in the retina in relation to S potential 95

SVAETICHIN, GUNNAR, KRATTENMACHER, WILLI, and LAUFER, MIGUEL. Photostimulation of single cones 101

DE VALOIS, RUSSELL L. Color vision mechanisms in the monkey 115

MATURANA, HUMBERTO R., LETTVIN, J. Y., MCCULLOCH, W. S., and PITTS, W. H. Anatomy and physiology of vision in the frog (*Rana pipiens*) 129

VERZEANO, M., and NEGISHI, K. Neuronal activity in cortical and thalamic networks. A study with multiple microelectrodes 177
